Shifting from coal to renewable sources, and therefore the need for new hydro, wind and solar generation plants, is a recognized goal in the Serbian politics.

This transformation is not only an energy story -- it is a foundational economic shift enabling Serbia to integrate with EU energy markets, attract industrial investors, reduce ...

Then there is wind and solar -- increasingly symbolic politically, but still materially modest in structural weight. New capacity has entered Serbia's system.

The plan includes projects in six sectors: electricity generation, transmission network, distribution network, natural gas, oil and petroleum ...

The plan includes projects in six sectors: electricity generation, transmission network, distribution network, natural gas, oil and petroleum products, and energy efficiency.

Serbia has significant potential for renewable energy production, both solar PV and wind power. The highest solar GHI intensity reaches 4.1 kWh/m² per day and distributed in the southern ...

Serbia has abundant land, but not all of it is usable for renewable development. Wind requires areas with consistent speed, minimal turbulence, and enough space to place turbines at safe ...

With new wind and solar power plants, successful RES auctions, and groundbreaking projects in green hydrogen and energy storage, the country is positioning itself ...

By 2035, Serbia could operate one of the most balanced renewable systems in Southeast Europe, blending

Serbia has good wind solar storage and transmission

wind from the Banat plains, solar from the agricultural basins, ...

Serbia has significant potential for renewable energy production, both solar PV and wind power. The highest solar GHI intensity reaches 4.1 kWh/m² ...

The major renewable energy companies present in Serbia are Masdar and Fintel Energija (Wind), Nova Commodities (Solar), New Energy Solutions (Wind), and CWP ...

Wind farms are currently more present in Serbia than solar power plants. Is this a natural consequence of Serbia's climate, or do you ...
