Powered by solar energy, the CitySolar compacting bin compresses and stores the same amount of refuse as twenty traditional 60-litre street bins. CitySolar fits a standard 120 or 240-litre ...

At YES Containers, we're helping shape the next generation of smart shipping containers. Whether you need a solar-powered home, a smart storage unit, or a high-tech ...

With increasing pressure to cut carbon emissions, smart airports are integrating energy-efficient infrastructure and promoting green logistics ...

From India to Australia, California to Germany, airports are installing vast solar arrays across terminal rooftops, parking structures, and unused land. These installations range ...

Features a built-in, patented solar-powered trash compactor which triggers automatically based on the bin's fill-level. It's compatible with standard 32G (120L) & 64G (240L) wheeled carts for ...

Our waste compacting smart bins have a built-in press with which they can compact the waste 5 to 8 times. At the top the solar compactors have a ...

Features a built-in, patented solar-powered trash compactor which triggers automatically based on the bin's fill-level. It's ...

The Middle East is constructing some of the world's most advanced airports with a strong focus on solar energy, smart mobility, and low-emission terminal operations.

Many airports install solar panels or wind turbines to power terminals. They also use advanced materials that

insulate buildings and ...

Many airports install solar panels or wind turbines to power terminals. They also use advanced materials that insulate buildings and reduce heating and cooling costs.

NARITA, Chiba -- Rubbish bins that harness the power of the sun to compress trash, and send a notification when collection is needed, have been installed at Narita Airport ...

NARITA, Chiba -- Rubbish bins that harness the power of the sun to compress trash, and send a notification when collection is needed, ...
