India added more than 40 GW of solar and wind capacity in 2025, while grid constraints, power contracting delays, and supply chain risks continued to affect project ...

The use of solar power is also necessary for India to achieve carbon neutrality by 2070, by achieving 500 GW of renewable energy by 2030, of which at least around 250 GW will be ...

Trends: Rapid capacity expansion: India's installed solar and wind capacity has crossed 180 GW, making renewables among the cheapest sources of new power generation. ...

Annual India Solar Report Card - FY2025 presents key insights, performance metrics, and trends from India's solar sector for the ...

As of September 2025, India's cumulative installed solar capacity reached 125.5 GW, comprising 85.2 per cent large-scale and ...

Annual India Solar Report Card - FY2025 presents key insights, performance metrics, and trends from India's solar sector for the fiscal year.

The study estimates India's total solar potential at 10,830 gigawatts (GW), far exceeding previous assessments while identifying ...

As of January 31, 2025, India has reached a significant milestone of 100 gigawatts in solar installed capacity.

Solar container outdoor power capacity in India
