What is a photovoltaic curtain wall?

They enhance thermal comfort and help prevent the greenhouse effect. A standard curtain wall offers no return on investment. In contrast, a photovoltaic curtain wall not only insulates the building but also generates power for over 30 years. This reduces monthly electricity bills and ultimately pays for itself over time.

What are Reynaers Aluminium curtain wall systems?

Reynaers Aluminium 's curtain wall systems, such as CW 50 and CW 60, combine functionality and design. They offer maximum design freedom and meet the highest standards for thermal and acoustic insulation, watertightness and wind resistance. These systems are ideal for both commercial and residential projects, from offices to luxury homes.

What is a curtain wall system?

In residential projects, curtain walls offer a unique aesthetic and maximum natural light, creating an open and modern living space. Curtain wall systems can be used in renovation projects, transforming an outdated facade into a modern and energy-efficient solution.

What is the UW value of a curtain wall?

Our curtain wall systems, such as Reynaers Aluminium CW 50, offer insulation values that meet the strictest standards, with a possible U_w value of up to $0.8 \text{ W/m}^2\text{K}$. Are curtain walls suitable for tall buildings?
