What's new with SolarEdge inverters?

Version 1.1, August 2024: Added the TerraMax model to countries supported by SolarEdge inverters. Version 1.0 June 2024: Initial version SolarEdge inverters can be used in many different countries. This document details countries where SolarEdge approves installation of its inverters.

What is inverter country setting?

Inverter country setting: to what country setting the inverter should be configured in order to comply with the local grid requirements. Some countries have a submenu that should be used; sub-entries are indicated with the following symbol: -&gt; SE11400H-US approved only for installations with no LVRT (low voltage ride through) requirement.

Does SolarEdge support low voltage installations?

Unless stated otherwise, the approval refers to low voltage installations. For medium voltage installations, contact SolarEdge support. Refer to the country details below for more information, as in some countries not all grids are supported or not all inverter models are supported.

Version 1.0 June 2024: Initial version SolarEdge inverters can be used in many different countries. This document details countries where SolarEdge approves installation of its inverters.
