Is there a trend in solar patent litigation?

The downward trend in the number of new solar patents has continued in the intervening years as the technology has matured, while there has been a corresponding uptick in patent litigation as solar power becomes more readily available and the commercial stakes grow higher.

What are the risks of installing a solar inverter?

The on-site health risks can further lead to other health issues and possibly death after installation. A solar inverter installer also faces cold and heat stress and falls, leading to injuries when working with a solar inverter panel.

Did Runergy infringe on REC Solar?

REC Solar has not yet commented on the infringement allegations raised. Early in 2024, Trina Solar initiated a claim against Runergy in the US for unauthorised use of its TOPCon solar cell technology used in its Hyperion solar panels (US patents 9,722,104 and 10,230,009).

Did Aiko solar infringe Maxeon's patent?

The Hague District Court in the Netherlands ruled that Aiko Solar did not infringe Maxeon's patent and the request for a preliminary injunction was refused. This finding has been appealed by Maxeon.

As the case develops, the outcome could have a significant impact on the competitive landscape of the solar technology industry, particularly in how solar inverters are ...

Consumer protection in the solar inverter market has become increasingly important as the adoption of solar energy systems continues to grow. The legal and ethical ...

Maxeon has alleged that all three companies infringe its patents by making, importing and selling n-type solar panels with TOPCon cells. Canadian Solar and Hanwha ...

The settlement concludes the infringement complaint brought by Tigo on July 11, 2022, Case No. Del.) alleging infringement of certain patents by SMA.

Duracell Power Center, known for its innovative solar battery and home-energy systems, is facing a legal challenge concerning alleged patent infringements. The company ...

Core Dispute: Plaintiff alleges that Defendant's SUN Series Microinverters infringe patents related to smart, scalable, and user-interface technologies for solar power inverters.

Global law firm White & Case LLP secured a significant win with the International Trade Commission (ITC), which issued a final determination finding "no violation" of section ...

In a notable development in the renewable energy sector, CyboEnergy, Inc. has initiated legal proceedings against Duracell Power Center, LLC, regarding infringement of two ...

Solar battery and home-energy system supplier Duracell Power Center LLC is infringing two patents related to solar power inverters, according to a federal lawsuit.

Maxeon has alleged that all three companies infringe its patents by making, importing and selling n-type solar panels with ...

As the adoption of solar energy continues to surge globally, the legal and compliance landscape surrounding solar panel inverters is becoming increasingly complex. Understanding these ...
