---

Facility owners seeking to reduce their operating costs, lower greenhouse gas emissions, and build resiliency at their facilities can benefit from installing on-site renewable energy generation ...

In 2024, generators added a record 30 GW of utility-scale solar to the U.S. grid, accounting for 61% of capacity additions last year. We expect this trend will continue in 2025, with 32.5 GW ...

Discover how large-scale energy storage systems boost grid flexibility, enable renewables, and power a cleaner, reliable future.

Discover the top 6 energy storage options for commercial solar, from lithium-ion batteries to hydrogen, and see which best suits your business.

AES just completed the first half of Bellefield, which will become the largest solar + storage facility in the US. The 1,000-megawatt (MW) Bellefield 1 project in Kern County, ...

Generate and store renewable energy with a solar and battery storage system at your facility to reduce energy costs, earn incentive payments, and improve corporate sustainability and ...

This program supports the U.S. industrial sector and other large energy users to add onsite energy technologies to their facilities. Large energy users can include campuses, hospitals, ...

Energy grids today are turning more and more to combined solar and storage setups where solar panels work alongside either lithium ion batteries or flow battery systems. ...

For solar installers and high-energy businesses, deploying large scale battery energy storage systems, optimizing large scale energy storage systems for regional needs, and selecting ...

With intermittent resources like wind and solar generation, battery storage fills in the gaps. That means facility managers can more easily bring on and off renewable energy, reducing the ...
