---

There are two main types of solar energy technologies--photovoltaics (PV) and concentrating solar-thermal power (CSP). On this page you'll find resources to learn what ...

NREL's PVWatts (R) Calculator Estimates the energy production of grid-connected photovoltaic (PV) energy systems throughout the world. It allows homeowners, small building owners, ...

People have used the sun's rays (solar radiation) for thousands of years for warmth and to dry meat, fruit, and grains. Over time, people developed technologies to collect solar energy for ...

Solar PV panels generate electricity, as described above, while solar thermal panels generate heat. While the energy source is the same - the sun - the technology in each system is different.

Discover how sunlight transforms into usable electricity with this step-by-step guide to solar energy generation. Explore the workings of photovoltaic cells, inverters, and energy ...

Solar panels are devices designed to convert sunlight into electrical energy. They are composed of numerous solar cells made of semiconductor materials, typically silicon, ...

Find solar panels at Lowe's today. Shop solar panels and a variety of electrical products online at Lowes .

Solar power, also known as solar electricity, is the conversion of energy from sunlight into electricity, either directly using photovoltaics (PV) or indirectly using concentrated solar power.

Tesla solar makes it easy to produce clean, renewable energy for your home and to take control of your energy use. Learn more about solar.

If you invest in renewable energy for your home such as solar, wind, geothermal, fuel cells or battery storage technology, you may qualify for an annual residential clean energy tax credit.

Solar radiation may be converted directly into solar power (electricity) by solar cells, or photovoltaic cells. In such cells, a small electric voltage is generated when light strikes ...

Project Sunroof is a solar calculator from Google that helps you map your roof's solar savings potential. Learn more, get an estimate and connect with providers.
