SolarToday Eastern Europe, a full-scope energy storage solutions provider, has successfully commissioned a 10.32 MWh utility-scale battery energy storage system (BESS) in ...

In a rising investment wave, firms in Romania are combining energy storage with solar, wind and hydropower or building standalone ...

In its first, the Romanian government has allocated EU funds for two major battery energy storage projects via the National Recovery and Resilience Plan. A utility-scale solar ...

Romania eliminates double taxation on battery energy storage systems to attract investors and accelerate renewable integration across the national grid.

In a rising investment wave, firms in Romania are combining energy storage with solar, wind and hydropower or building standalone systems.

Construction of battery systems is scheduled to begin at the end of 2025, transforming the PV projects into hybrid systems that offer higher returns through increased ...

Construction of battery systems is scheduled to begin at the end of 2025, transforming the PV projects into hybrid systems that offer ...

Nova Power & Gas's 400 MWh project in Cluj County is the largest battery energy storage system (BESS) to date to have been connected to Romania's grid.

"Romania needs battery storage, not just solar panels," says CEO Sever Silaghi. "The country has made remarkable progress in solar generation, but true energy ...

In Romania, battery energy storage systems have become essential with the rapid growth of solar and wind energy capacity. Our country added over 2,000 MW of photovoltaic panels in 2024 ...

The Electrica Group, a leading player in the Romanian energy sector, has announced a significant investment in energy storage with the ...

The Electrica Group, a leading player in the Romanian energy sector, has announced a significant investment in energy storage with the launch of a project to build 15 ...
