Are there state-level incentives for solar energy storage?

To date, state-level performance incentives for storage have typically been added to solar incentives. Perhaps the best-known state-level storage incentive in the US is California's Self-Generation Incentive Program (SGIP). SGIP provides a dollar per kilowatt (\$/kW) rebate for the energy storage installed.

What is the best incentive for solar storage?

The best incentive for storage is the federal investment tax credit (ITC). The exact same ITC that provides a 30 percent credit on the cost of your solar system provides that same benefit to storage systems under certain conditions.

How do solar incentives work?

These incentives typically take one of two forms: an upfront rebate or a performance-based incentive. Rebate programs are exactly what they sound like: states provide a direct cash payment after your battery is installed and connected to the grid. To date, state-level performance incentives for storage have typically been added to solar incentives.

Are solar storage systems eligible for a 30 percent credit?

The exact same ITC that provides a 30 percent credit on the cost of your solar system provides that same benefit to storage systems under certain conditions. Due to the Inflation Reduction Act, as of 2023, all residential storage systems over 3 kilowatt-hours (kWh) in size are eligible for the ITC.

Explore upfront incentives, tax credits, and low-interest financing to make on-site solar more affordable for your home. Discover how upfront incentives, tax credits, and low-interest loans ...

Explore the complete guide to solar grants, subsidies, and renewable energy incentives. Learn how to finance your solar panel and energy storage system.

Energy storage is essential to a resilient grid and clean energy system. Learn about the types of energy storage,
