Are Chinese solar power inverters connected to critical infrastructure grids?

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters connected to critical infrastructure grids across the country.

Are Chinese-made solar inverters a security risk?

U.S. energy officials are reportedly reassessing the security risks posed by Chinese-made components in renewable energy infrastructure after discovering hidden communication devices inside certain solar inverters.

Are Chinese solar inverters hiding secret radios?

In May of 2025, U.S. experts found undocumented communication modules and secret radios embedded in some Chinese-manufactured solar inverters and battery systems. Not listed in product documentation, these shadow components create hidden backdoors that can circumvent utility firewalls and allow remote access to the devices.

Will Chinese solar inverters evade state-specific bans?

If not, China will continue to evade state-specific bans, with new vulnerabilities capable of emerging from wherever inverters are produced next. Undocumented radios found in Chinese-made solar inverters pose a threat to U.S. energy infrastructure and security, enabling disruption of critical systems.

A national security crisis could occur due to a high percentage of China-made inverters installed in Taiwan's solar energy systems, and lawmakers should keep the Ministry ...

U.S. energy officials are reportedly reassessing the security risks posed by Chinese-made components in renewable energy ...

In November, solar power inverters in the United States and elsewhere were disabled from China, highlighting the risk of foreign influence over local electricity supplies and ...

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within ...

A national security crisis could occur due to a high percentage of China-made inverters installed in Taiwan's solar energy ...

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters ...

Unfortunately, undocumented communication devices have been recovered in a multitude of different Chinese-manufactured batteries and solar power inverters that bypass ...

Undocumented radios found in Chinese-made solar inverters pose a threat to U.S. energy infrastructure and security, enabling ...

Undocumented radios found in Chinese-made solar inverters pose a threat to U.S. energy infrastructure and security, enabling disruption of critical systems.

Most recently, both Japan and South Korea opened investigations into their China-made solar panels over fears that they, too, ...

In a shocking revelation that has sent ripples through the cybersecurity and renewable energy communities, security experts have discovered undocumented ...

Technical experts conducting detailed hardware inspections, or "teardowns," of inverters connected to U.S. power grids revealed the presence of unauthorized communication ...
