This article provides a detailed interpretation of six new national standards related to grid connection and energy storage set to be implemented in 2024, summarized as follows:

Several IEC technical committees (TCs) prepare international standards relevant to EES: Publishes standards covering storage pumps used in ...

This study investigates the use of capacity-based tariffs, export tariffs, and curtailment policies to reduce negative grid impacts without hampering PV deployment.

A grid connection agreement (e.g. with Swissgrid) outlines the terms and conditions for connecting a renewable energy system to the electricity grid. It includes technical ...

Switzerland is expanding rules for rooftop solar, energy storage, and energy communities to expand self-consumption and ease pressure on the grid. The new regulations, ...

Several IEC technical committees (TCs) prepare international standards relevant to EES: Publishes standards covering storage pumps used in pumped-storage hydro power plants. ...

Switzerland is expanding rules for rooftop solar, energy storage, and energy communities to expand self-consumption and ease ...

This document defines the technical and operational connection conditions for converter-based energy storage systems (CESS) that are to be connected to the transmission system (TS) in ...
