---

California already has the most utility-scale battery storage systems nationwide but it is about to set a new record. According to developer Intersect Power, the company aims to ...

The United Arab Emirates is building the world's largest solar and battery storage project that will dispatch clean energy 24/7.

World's largest vanadium flow battery goes online in China with 1 GW solar plant The record-breaking battery will boost renewable energy use by over 230 million kWh a year.

Once built, DCEP will be the largest battery energy storage system in the world, highlighting California's leadership in clean energy innovation and infrastructure.

California regulators have approved a milestone solar + storage project in Fresno County, kicking off this edition of Projects Weekly.

California Energy Commission (CEC) has approved a 4.6GWh solar-storage project, DCEP, which will be built across 9,500 acres of land in Western Fresno County. The project will ...

Delivering up to 1 gigawatt of baseload power every day generated from renewable energy, the UAE's latest project will be the largest solar and battery energy storage system in ...

Consisting of almost 2 million solar panels, the sprawling solar farm has 875 megawatts of capacity, the highest of any such facility in the US. Crucially, it also features ...

Recently, the world's largest photovoltaic (PV) and energy storage project was awarded to a consortium including several Chinese companies. The USD6 billion project in ...
