Why is Tunisia investing in a secure electricity network?

To ensure a resilient electricity network, Tunisia is investing in modern, secure infrastructure. The ELMED interconnection project, which will link Tunisia to Italy by 2028, will play a key role in stabilizing energy supply, while supporting the energy transition in Tunisia and Europe.

Does Tunisia have a good electricity infrastructure?

The updated infrastructure map shows that Tunisia's electricity infrastructure has been significantly expanded relative to the 2017 data plotted in Figure 2, with a range of interconnection ratings spanning the country (90 kV, 150kV, 225kV, 400kV).³⁷ It is necessary to analyse the development of the past energy demand to project that of the future.

How much money does Tunisia invest in power & heat generation?

The T-1.5oC scenario requires an investment of 110 billion Tunisian dinar (trillion TND US\$36 billion) in power generation and 129 billion TND (US\$42 billion) in heat generation. The total investment in power and heat generation capacities therefore adds up to 239 billion trillion TND (US\$78 billion).

How can Tunisia increase its energy access rate?

Tunisia must build up and expand its power generation system to increase the energy access rate to 100%. Building new power plants - no matter the technology - will require new infrastructure (including power grids), spatial planning, a stable policy framework, and access to finance.

Eckehard Troster and Rabea Sandherr travelled to Tunisia to present the results and findings of the project. The event was held on June, 26 th in Tunis for representatives of the Energy ...

The projections for population development, GDP growth, and energy intensity are combined to project the future development pathways for Tunisia's final energy demand.

Tunisia, [a] officially the Tunisian Republic, [b][19] is a country in the Arab Maghreb in North Africa. Tunis is its capital. Since history has been recorded, there were Berber tribes living in ...
