-----

The company described expanded applications in battery swap systems, passenger vehicles, commercial vehicles, and energy storage, indicating a significant commercial ...

Representatives of government, science and business discussed the idea of building a factory in Poland to produce batteries using sodium-ion technology during a meeting ...

Introduction CATL has fired the loudest shot yet at lithium's dominance. With its new CATL's Naxtra sodium-ion battery platform, the world's largest battery maker is signaling that ...

Our focus is on exploring the role and implementation of Battery Energy Storage within this system. To achieve this, we seek to build an interdisciplinary community that fosters the ...

Instead of bulky generators, they whip out suitcase-sized battery units - Poland's portable power storage projects in action. These mobile energy solutions are transforming how ...

Learn about Poland's EUR1 billion energy storage subsidy aimed at installing 5.4 GWh of BESS by 2028, strengthening grid stability and accelerating the green transition.

This article explores how innovative battery storage systems are transforming solar power adoption in Poland's capital while addressing grid stability challenges.

CATL plans large-scale sodium-ion battery deployment in 2026 for swap systems, EVs, and energy storage. Its Naxtra cells offer up to 175 Wh/kg energy density, -40 °C ...

Take the Warsaw North District microgrid project: using recycled EV batteries and solar panels, they reduced
