---

Once energised in 2026, the Wellington Stage 1 BESS will support the growing demand for reliable, renewable energy across Australia while lowering energy costs for future industries. ...

Once energised in 2026, the Wellington Stage 1 BESS will support the growing demand for reliable, renewable energy across Australia while ...

We are at the forefront of the global renewable energy storage industry, delivering customized Battery Energy Storage System (BESS) containers / enclosures to meet the growing demand ...

A mega-battery project in NSW is moving ahead. Construction is set to begin on the first stage of the Wellington Battery Energy Storage ...

Emerging markets in Africa and Latin America are adopting mobile container solutions for rapid electrification, with typical payback periods of 3-5 years. Major projects now deploy clusters of ...

A mega-battery project in NSW is moving ahead. Construction is set to begin on the first stage of the Wellington Battery Energy Storage System [BESS] in Central West NSW.

Renewable energy developer Ampyr Australia has reached financial close on its 300MW/600MWh Wellington battery energy storage ...

The Wellington Stage 1 BESS is AMPYR's first grid-scale battery energy storage system to reach financial close in Australia. This project is scheduled to be energised in 2026, ...

Renewable energy developer Ampyr Australia has reached financial close on its 300MW/600MWh Wellington battery energy storage system (BESS) Stage 1 in New South ...

Ampyr announced it has achieved financial close for the AUD 340 million first stage of the Wellington BESS project to be built about 3 km northeast of the Wellington township in ...

CentrePort is taking another step on its energy journey with an onsite battery energy storage system (BESS) which will improve resilience and enhance the potential for ...

By using the BESS to store energy and manage loads, the diesel generator runs less frequently and more efficiently. This reduces fuel consumption and operational costs.
