When will the Wellington substation be built?

Construction of Stage 1 (300MW /2 hours) will start mid-2025,finishing early 2027. Plans for construction of Stage 2 are ongoing,but construction is likely to follow 12 to 18 months behind Stage 1. The existing Wellington substation is very strategically located within the NSW energy grid.

How long will it take to build the Wellington Battery?

Plans for construction of Stage 2 are ongoing,but construction is likely to follow 12 to 18 monthsbehind Stage 1. The existing Wellington substation is very strategically located within the NSW energy grid. The output from both stages of the Wellington Battery represents the demand from over 60,000 homes.

What is the Wellington Stage 1 battery energy storage system?

The Wellington Stage 1 Battery Energy Storage System (or BESS) will have a capacity of 300 megawatts and store 600 megawatt-hours of energy and is expected to start working in 2026. Once running,this battery will help make renewable energy more reliable and affordable for homes and businesses,especially as more industries need clean power.

Will Wellington Bess transform NSW's energy landscape by 2026?

Wellington BESS project to transform NSW's energy landscape, providing reliable, affordable power by 2026.

FBI director Kash Patel confirmed the US would be establishing a FBI base in Wellington to combat the influence of China in the Pacific. ...

CentrePort Wellington "s energy transition is gathering pace now that a contract for the design and build of its pilot Battery Energy Storage System (BESS) has been awarded.

Construction and operation of an on-site BESS substation, comprising two 330 kilovolt (kV) transformer bays, 33/0.440 kV auxiliary transformers, and auxiliary services buildings including ...

After construction, the BESS will become operational, providing energy storage and discharge as required by
