Why should you choose a solar system in Wellington?

Our range of solar systems offers the perfect balance of savings, sustainability, and resilience. Perfect for Wellington homeowners who want to stay connected to the grid while enjoying significant savings on energy bills. Ideal for those seeking energy independence and backup power during outages, while still maintaining a grid connection.

Is Wellington a good place to invest in solar energy?

Enjoy clean, renewable energy on your terms with \$0 upfront. With 2,053 annual sunshine hours and moderate energy costs, Wellington presents a compelling case for solar energy adoption. The region's consistent solar performance and growing installation rates demonstrate the viability of solar power even in the windy capital.

How much will the Wellington North solar project cost?

Upon completion, the Wellington North solar project is expected to generate approximately 700,000 MWh of clean energy a year, which will be sufficient to power 116,000 NSW homes. The proposed solar project, which will have an operational life of 30 years, will involve an estimated investment of A\$540m (\$405m).

Who developed the Wellington North solar project?

Credit: Soonthorn Wongsaita on Shutterstock. To be developed by Lightsource bp, the 400MW solar plant will generate enough energy to power 116,000 homes. Credit: Lightsource bp. The Wellington North project was originally developed by AGL Energy and was acquired by Lightsource bp in 2020. Credit: petrimalinak on Shutterstock.
