Where is the first battery energy storage system in Latvia?

On November 1 Latvia's largest wind energy producer Utilitas Wind opened the first utility-scale battery energy storage battery system in Latvia with a total power of 10 MW and capacity of 20 MWh in Targale, Ventspils region.

Will Bess be able to deploy storage capacity across Baltic states?

“Future projects will be carefully evaluated to strategically deploy storage capacities across the Baltic states in order to maximise the benefits for the security of supply and customers,” the company added, giving a broad hint that it will also be looking to place BESS assets in Estonia and Lithuania.

What are Bess assets?

Its BESS assets will sit in a portfolio alongside hydro power plants (installed capacity ~1550 MW), combined heat and power plants (~1050 MW) and solar and wind capacities under development.

Latvenergo, a prominent public electricity utility in Latvia, has invited a tender for the procurement of Battery Energy Storage Systems ...

Reduce electricity costs, balance peak loads and gain additional revenue from balancing markets with modern battery energy storage systems. SIA TESLA provides a full cycle - from concept ...

Latvenergo, a state-owned energy company based in Latvia, plans are to expand its generation portfolio with the development of ...

Agrolats Group plans to deploy similar BESS installations across additional sites in Latvia, extending the benefits of storage to more regions and further contributing to the ...

Latvenergo, a state-owned energy company based in Latvia, plans are to expand its generation portfolio with the development of battery energy storage systems (BESS), ...

Latvia has taken a significant step towards a greener future with the commissioning of its first utility-scale battery energy storage system (BESS). The 10MW/20MWh BESS, ...

This autumn, the Battery Energy Storage System (BESS) will be connected to the Latvian electricity transmission system, contributing. ...

JOINT-STOCK COMPANY "LATVENERGO has floated a tender for Supply of Battery Energy Storage Systems (Bess). The project location is Latvia and the tender is ...

The first BESS projects are being implemented in Latvia and at Latvenergo production sites - starting with the smaller-scale BESS at Latvenergo AS CHPP-1 and ...

In Latvia, developer Utilitas Wind announced the official opening of a 10MW/20MWh battery energy storage system (BESS) last ...

Latvenergo, a prominent public electricity utility in Latvia, has invited a tender for the procurement of Battery Energy Storage Systems (BESS).

This autumn, the Battery Energy Storage System (BESS) will be connected to the Latvian electricity transmission system, contributing. The total project investments amount to ...
