---

To control different power generating units, as well as components combined into a higher-level power plant, Bachmann electronic has developed a product that offers complete functionality ...

A powerful, real time optimization framework integrated into the automation system supports the control of wind power plants to be taken to the next ...

Reliable wind turbine control systems and SCADA systems to enhance operation at an individual turbine or an entire wind farm. Emerson brings proven expertise with control designs for 350+ ...

To control different power generating units, as well as components combined into a higher-level power plant, Bachmann electronic has developed a ...

Phoenix Contact provides intelligent solutions which can be used to efficiently automate sub-applications, the complete wind turbine generator (WTG), all the way to a wind farm.

Wind turbine automation refers to the integration of advanced control systems, sensors, and software that enable wind turbines to operate efficiently with minimal human ...

We offer a broad range of wind turbine control systems that can be used for on-shore or off-shore wind power generation and wind farm management. We have global domain expertise and ...

A powerful, real time optimization framework integrated into the automation system supports the control of wind power plants to be taken to the next level. For a fleet of plants, Symphony Plus ...

Next-generation wind turbine control systems are evolving with intelligent automation, predictive monitoring, and grid-aware design to drive efficiency, resilience, and ...

We offer a broad range of wind turbine control systems that can be used for on-shore or off-shore wind power generation and wind farm management. ...

Automate wind power installations the easy, efficient, scalable, modular, open and flexible way with an integrated system.

Connecting sensors/actuators takes a lot of time. Standardized interfaces allow sensors to be connected via plug & play. Every minute of downtime counts. Intelligent monitoring and ...
